

HemiPleat® Retrofit

Advantages

- Camfil Pleat Separator Technology
- Low Pressure Drop
- Extended Filter Life
- High Filtration Efficiency
- 80/20 PolyTech™ media
- Pour in place one piece gasket
- Broad design portfolio

Application: Air Pollution Control filter cartridge to collect dust, fumes and/or oil mist in many different industrial applications and processes

Execution: Please refer to HemiPleat Retrofit data sheet

Media: PolyTech™ - HemiPleat (Green, FR, Carbon, Synthetic – Also available with eXtreme)

Gasket: Urethane pour-in-place one piece gasket

Separator: HemiPleat Separator Technology

Potting component: Polyurethane

Cage: Internal GV support cage

Efficiency: 99.99% on 0.5 micron and larger particles by weight

Filter Class: L, M

Temperature / Humidity: Max. 70 °C

Options: Flexible length <1000 mm, flexible top style, stainless steel

Filter Cartridges

- Lower pressure drop through open pleat spacing improves cleaning efficiency, which will reduce energy costs through less compressed air consumption during cleaning in many applications.
- More media available for filtration and therefore improved performance and longer life time.
- The separation beads, NOT the media beads, contact the inner cage, protecting the media from frictional damage.
- Improve the performance or solve problems such as short filter life with existing collector system. Camfil filter cartridges are made with the new HemiPleat® PolyTech™ media, the most advanced pulse cleaned media ever made. GUARANTEED.
- Camfil offers replacements upgrade cartridges to fit almost ANY cartridge collector.
